Please fill out all required information for each animal you wish to enroll into our CowManager program. Each animal will be tagged with a CowManager monitor. A placement fee of \$25 per animal will apply. This fee will cover enrolment costs for Fertility, Nutrition, and Health monitoring.

Once the monitor is placed a seven-day transition period is required for the system to learn the animal's behavior. Monitors send reports and alerts to staff's mobile device/s and desktops 24/7. Paragon management protocols remain the same even when monitors are placed to ensure true animal husbandry.

Once animals are ready to go home the monitor can be removed. If you wish to leave the monitor in for future use a one-time fee of \$38 will apply for each device. The owner is responsible for lost or damaged monitors. Monitors will not work unless they are connected to our network, but once cows return to Paragon they can be reactivated for immediate use. All monitors are backed by a lifetime warranty. If the animal is sold or will not be returned, we ask that you return the device, and a refund will be issued.

**Calves will not be tagged with the monitoring system*
